

Instructions - Propane Grill

IMPORTANT NOTE: It is recommended that you use a long grill lighter to avoid contact with your hands. Always use in a well-ventilated area-

OUTDOOR USE ONLY!

1. Be sure that all valves on the grill are in the OFF position.
2. Connect the propane tank and open the valve.
3. Open the regulator valves on the grill slightly.
4. Light each pilot bar through grates - CAREFULLY!
5. Turn the regulator valves on the grill to the desired setting.
